

CAPITAL EDUCATIONAL INSTITUTIONS PREPARED FOR RECORD SEASON.

**STEWART COLLEGE
OPENS TOMORROW
FOR ITS 11TH YEAR**

History of School indicates Progress, Report Shows.

HAS RECORD SEASON

Business Classes Complete

Work With Much Credit.

The fall term of Stewart's Business College, one of Washington's oldest and largest business schools, will open tomorrow. Short-hand, typewriting, bookkeeping and higher accounting courses will be given. The founding of Stewart's, whose president is Frank C. Stewart, is an interesting correlation of data:

The school was founded September 1, 1912, in the Brentano building, Twelfth and F streets northwest, by Mr. and Mrs. Frank C. Stewart, an interesting correlation of data:

At the end of the fourth year the third was added and equipped.

Stewart School now occupies three floors of a modern office building.

An Accredited School.

Stewart School is the only Washington school accredited by the Association of Standard Business Colleges of America. Each accredited school is recognized as the leading business college of its particular community.

The object of this association of schools is to promote efficient business training through proper methods of procedure, standardized courses of study and a competent business organization necessary in conducting a modern commercial college.

The Association of Standard Business Colleges of America. Accredited schools include only such schools as offer courses of the highest standards, which assures to those seeking efficient business training a positive means of selecting a first-class institution.

The secretarial course is in charge of some of the most expert instructors, and is designed to afford a technical equipment to young men and women of beyond the eighth grade and high school for the most responsible positions as secretaries in the uplifting environments of executive work. Graduates of this course are being chosen for some of the most important positions with government leaders and large corporations.

The fundamentals underlying the qualifications necessary to fill secretarial positions are: Business practice, English, bookkeeping and banking, correspondence, commercial law, shorthand, typewriting and office management.

In addition to the above named subjects, the student is given a comprehensive course in the following subjects: Writing, spelling, arithmetic, English, business correspondence and office appliances.

This course is designed to fit one to fill any position in an office, but qualifies one to take charge of an office and superintend the work of others.

The business course is short at best, and certainly one should spend enough time to complete the secretarial course.

It is especially important if you expect to be something more than a mere stenographer or bookkeeper. If you aim to be a manager or private secretary, it is very necessary to be properly trained.

Government Needs Stenographers & Typists—Both Men and Women

Civil Service examination Oct. 10, special preparation, \$5; school, 5 days and 5 nights. The Civil Service Preparatory School, S. E. corner 12th and F Sts. N. W., Phone Fr. 2030.

George Washington University Law School

Co-educational. Begins 26th year on September 27th. Member of Association of American Law Schools. Strict standards. Most approved methods of instruction. Full courses offered both morning and evening. Optional morning classes, 7:30 to 8:40. Forenoon classes, 9 to 10:30. Late afternoon classes, 5:10 to 6:30. For full information write or call upon the secretary. Telephone Main 6503. Law Building, 1425 K Street N. W.

Dean Martin L. Ferson, of George Washington University Law School.

This school will open its fifty-eighth year on September 27. On its faculty are included eight full-time professors.

School of Commerce Announces Day Course

The plan of the day courses of the National School of Commerce is such that students may complete the very important work of the first three semesters of the full professional course and at the same time acquire immediately usable training for the better class of position in organized business. At the close of this eight months' training period, the exceptional placement facilities of the school are available without charge in assisting the student to obtain employment. The course may then be completed in the evening.

The class lectures and recitations are conducted by the same professional men who are in charge of the evening courses.

Each semester is ten weeks in duration, and includes all the studies of the regular evening school semester as well as supplemental training in the solution of problems from actual practice. Courses in mathematics and English are also of broader scope than those offered in evening classes.

Tuition for each semester in the day school is \$60 payable; \$25 on enrollment and \$17.50 on the first of each month until paid.

Courses in Practical Psychology

Miss Mabel Dill

Tuesdays, Sept. 19—Jan. 2

8 P. M.

F. A. TONDORF

SEISMOLOGIST

AT GEORGETOWN

Famous Laboratory for Earthquake Observations.

The Seismological Observatory, originally founded in 1911 through the generosity of Patrick O'Donnell, A. B. '92, A. M. '93, LL. B. '94, has been further equipped through the continued kindness of the friends of the university. A new cave has been located beneath the quadrangle, measuring 12 feet 4 inches width, 30 feet 10 inches length and 11 feet height. Care has been taken to make this home of the new instruments both heat and damp proof. The present equipment consists of an astatic horizontal seismograph after Wiechert, carrying a stationary mass of 200 kilos, also a vertical seismograph of the same type of 50 kilos mass. The latest additions are two Bosch-Omori pendulums of 25 kilos mass each and two conical pendulums, after Dr. Mainka, of 130 kilos mass each. A concrete building, situated on Observatory Hill, at an altitude of 155 feet above sea level, shelters a Bosch-Omori photographic instrument with pendula of 200 grams each. The time is automatically registered on these instruments by four contact clocks, noting minutes and hour.

The clocks are corrected by time signals received at this observatory through the kindness of the Western Union Telegraph Company. An 80 kilos horizontal seismograph of the Wiechert type, which for four years formed part of the scientific equipment of the Crocker Land Expedition, has been returned and has been sent to Guatemala City, Guatemala, where it is installed in a seismological station.

Monthly reports of all earthquakes recorded at this observatory and a list of all seismic disturbances received at this station through the courtesy of the several news agencies of the United States, as likewise a yearly bulletin, tabulating all available seismic data, are sent to over 100 observatories the world over, and the same are also published in the "Monthly Weather Review," published by the Weather Bureau of the United States Department of Agriculture.

Washington School of Art Opens Tomorrow

The Washington School of Art will open its session tomorrow morning with day and evening courses offered in illustrating, cartooning, fashion drawing, lettering, drawing from life and color. This is the fourteenth year of the school's operation, the past year of which has witnessed exceptional progress under the direction of Will E. Chandlee. The object and purpose of the school were stated recently by Mr. Chandlee in the following sentences:

"There are many clever young people today whose names are as yet unknown, who are earning from \$25 to \$75 per week as commercial illustrators and designers, and it is from their ranks that the future famous illustrators will come.

"Our school is designed to give to each pupil not only general instruction in all matters pertaining to the making of newspaper, magazine and commercial illustrations, but to teach those facts which, aside from a knowledge of art itself, are essential to the financial success of the pupil as an artist.

"It must be borne in mind, to make a practical success of your work, you must first know what kind of drawings are required and second, you must know how such drawings are to be made.

"It is understood that each pupil wishes to learn, not only to draw but how to use his acquired knowledge of drawing to his own best advantage. It appears evident, therefore, that in seeking instruction you should apply to one who has not only been successful himself, but who numbers among his pupils those who have been equally successful."

The Misses Maret French School

Care of Pupils Described as Ideal.

The school was established in 1911, and its success has proved that it filled a need in Washington. The results are so satisfactory that the parents and the principals feel entire confidence in the methods that have been pursued. The growth of the school made a change of quarters necessary, and in September, 1915, it was transferred to the building it now occupies, on Connecticut avenue, in a very attractive part of Washington, near Dupont Circle. The classrooms are large, bright, well ventilated and sunny.

In 1919 the first two years of high school were added to the program, which formerly provided only for the two years of "Classes Infantines" for children 4 to 6 years old and for eight grammar school grades for boys and girls of 6 to 14 years. The last two years of high school will be added gradually. The high school work is for girls only.

All subjects are studied in French, which, thus learned, becomes a second mother tongue, without any detriment to the progress of the pupils in their general studies.

Make Your Dollar Stretch

THE purchasing power of a dollar bill has shrunk considerably in the last ten years. There has never been a time when discriminate buying paid bigger dividends.

Every day this newspaper contains information that you should have to increase your buying power. The advertisements are intimate little lessons in every-day economy. They teach you how, when and for what your dollar will go farthest.

To those who know how to use it, newspaper advertising is a watchdog of dollars—a continuous source of economy and satisfaction.

Merchants tell of their bargains through the advertisements. Almost every new opportunity is offered through an advertisement. Practically every unusual buy is advertised.

You can stretch your dollar to its elastic limit by keeping abreast of the opportunities to get full value.

There's just one way to do this.

Read the advertisements.
